Target Audience:

The lectures will be aimed at general sonographers/ultrasound practitioners who perform paediatric ultrasound intermittently within their daily practice. Tips and tricks for scanning paediatric patients and interpreting their images will be highlighted. The latest best practice will also be discussed. Attendees will hopefully leave with more knowledge and confidence to perform the discussed examinations in their general practice. Live scanning sessions will allow for attendees to ask questions and discuss clinical problems encountered

START AEDT	SATURDAY 5 MARCH 2022 PROGRAM	PRESENTER
