

## DMU Video Subscription Series

The DMU Video Subscription Series, available to all ASUM members who are DMU candidates, is intended to support preparation for the DMU examinations. Please note this is not a comprehensive program and will not, in itself, adequately cover all aspects of the DMU Syllabus. This list is provided by the ASUM Education Department, which is separate from the ASUM DMU Board of Examiners.

ASUM is offering candidates the choice of hiring 8 Videos for a total subsidised cost of \$77.00, to be dispatched 4 at one time over two months. Videos must be returned within the month so that the next loan instalment may be processed. Please number the 8 titles in the order you would like to receive them and fill in the payment details below.

Please note to receive all 8 videos before the July exam you will need to subscribe before the end of February.

### Physics

- 49 DVD Haemodynamics (Thanasis Loupas, 1994) and Colour Doppler (Rob Gill, 1994)
- 70 DVD Basic Physics and Basic Imaging (Mike Dadd, 1997)
