

ASUM CCPU Competence Assessment Form – Summative Assessment

Clinician Performed Neonatal Lung Ultrasound

Candidate: _____

Assessor: _____

Date: _____

To pass the summative assessment, the candidate must pass all components listed:

Prepare patient		Competent	Prompted	Fail
	Position			
	Informed			
Prepare Environment				
	Lights dimmed if possible			
Probe & Preset Selection				
	Can change transducer			
	Selects appropriate transducer			
	Selects appropriate preset			
Data Entry				
	Enter patient details			
Image Acquisition				
	Optimisation (depth, freq, focus, gain)			
Scans	For right and left lung			
	Anterior longitudinal			
	Anterior superior transverse			
	Anterior inferior transverse			
	Lateral longitudinal			
	Posterior longitudinal & transverse			
Identifies	Soft tissues			
	Ribs			
	Pleural line			
	A lines			
	B lines			
	Pleural sliding			
	Pathology			
Record Keeping				
	Labels & stores appropriate images			
	Documents any pathology identified			
	Completes report			
	<i>Each view adequate / inadequate</i>			

	<i>Documents scan</i>			
	<i>Describe findings briefly</i>			
	<i>Integrates ultrasound findings with clinical assessment and explains how the findings might change management</i>			
Machine Maintenance				
	Cleans / disinfects ultrasound probe			
	Stores machine and probes safely and correctly
