

### **Sonologist (COGU/DDU)**

A unique opportunity exists to join one of the country's leading teams of Sonologists at a premier provider of specialist obstetric and gynaecological diagnostic ultrasound services in Melbourne.

- Leading Ultrasound provider, Monash Ultrasound for Women
- Permanent part-time position (negotiable)
- Working across various Melbourne locations

### **Monash Ultrasound for Women are leading the future of reproductive health**

Monash Ultrasound for Women (MUFW) is a renowned diagnostic ultrasound medical practice, devoted to meeting the needs of women at various stages of their lives. Our doctors are specialist Obstetricians and Gynaecologists (O&G) who have further specialised in ultrasound, high-risk obstetrics and reproductive genetics.

MUFW is part of the Monash IVF Group. Monash IVF Group is renowned for advancing the delivery of reproductive health services for contemporary lifestyles. You'll be joining a team of multidisciplinary specialists who collaborate to improve the experience and outcomes for patients with care and compassion.

### **Why work with us?**

At MUFW, we are more than just a workplace —we are a passionate and innovative community dedicated to empowering individuals and making a real difference in the world of fertility.

We believe in fostering a culture of continuous growth and development, offering extensive learning and development opportunities to help you advance your career.

### **An essential role in reproductive health**

You will work alongside industry-leading clinicians as a part of a team committed to the Monash IVF Group Principles: Care, Collaborate, Communicate, Commitment, and Create – all in support of our mission to help bring life to the world.

In your role as Sonologist, you will perform high-quality obstetric and gynaecological tertiary-level reviews and procedures.

This includes, but not limited to:

- Interpreting and reporting on ultrasound scans
- Conducting clinical procedures
- Undertaking complex ultrasound scans
- Providing patients with exceptional care and support
- Provide referring clinicians with detailed patient reports and where required liaise to discuss management options.
- Mentoring and providing expert clinical advice to staff

You will be supported by an experienced and multidisciplinary team of Sonographers, Genetic Counsellors, Phlebotomists and Administration team members.

### **Are you the ideal candidate for us?**

- Fellow of Royal Australian and New Zealand College of Obstetricians and Gynaecologists
- Certification in Obstetrical and Gynaecological Ultrasound (COGU); or
- Diploma of Diagnostic Ultrasound in Obstetrics and Gynaecology (DDU)
- RANZCOG certification to perform Nuchal Translucency scans
- Satisfactory National Police Certificate
