

Biography:

### **Dr Lucy Law**

Dr Lucy Law (B.Sc (Preclinical Human Bio.), Grad Dip (Ultrasound), AMS (Cardiac), ESCVI CHD, PhD (Rheumatology)) is an Echocardiographer and researcher working for Menzies School of Health Research (Darwin, NT).

After completing her PhD in Sweden Lucy relocated back to Australia where she pursued her passion for indigenous health. With advanced knowledge of rheumatology and cardiovascular physiology, and interest in chronic disease and paediatric echo, Lucy found a position with the team at Menzies working on combatting a preventable and largely forgotten about disease in rural and remote Australia, rheumatic heart disease (RHD).

Lucy currently works clinically as a paediatric and adult echocardiographer across the Northern Territory and in research with the RHD team for Menzies across the Top End (NT), Pilbara (WA) and Timor Leste.
