

Biography:

Jacqui Williamson

Jacqui completed a PhD in 2025 with a thesis titled Echocardiographic Elements of Rheumatic Heart Disease and now works as a Senior Research Officer for Menzies School of Health Research. Jacqui is passionate about RHD research and is heavily involved in training and supervision of non-expert practitioners in the performance of screening echocardiography for the NEARER project at Menzies. She is also an investigator for a global ARF platform trial (ACT4RHD) which aims to evaluate novel therapies for the treatment of acute rheumatic fever, the precursor to RHD. Jacqui is based in Adelaide and also holds a clinical position as a Senior Cardiac Sonographer at Flinders Hospital.
